CUSTOM ENGINEERING SERVICES

Has your project stalled because the right development skills and resources weren't available? One way to overcome this issue is to outsource the project. But how do you find a vendor you can trust with your critical software development project?

You need someone that has a proven track record and a trusted name in the industry with the ability to deliver on time and within budget.

Caldera's Professional Services group meets all these requirements. With over 20 years in the industry, Caldera understands how to get the job done.

Caldera's experience is with UNIX® and Linux® systems, but we have completed projects across a number of operating system platforms and layered technologies for OEMs, ISVs, Integrators and Peripheral manufacturers.

The combination of our project management methodology and our unrivalled development experience ensures success across a wide range of engagements.

SERVICES

- Device driver development and maintenance
- Application migration and porting
- Systems software development and maintenance
- Embedded systems and specialist device operating system development
- Server and server appliance - small footprint and dedicated function server production

ENGAGEMENT MODELS

- Per Project Custom Proposal
- Time & Materials
- Annual Programs
- Technology labs

UNIFYING UNIX®

WITH LINUX® FOR

BUSINESS™

ENGAGEMENT MODELS

Per Project Custom Proposal

Driven by an agreed specification, our engineers work on a fixed price project basis to a defined schedule.

Time & Materials

Where a specification has not been fixed, we can start work on a day/week/month basis at a pre-agreed rate.

Annual Programs

For a fixed annual fee we can provide a follow-on program for development projects requiring on-going maintenance and enhancements.

Technology Labs

For long term relationships we set up lab teams dedicated to a customer. A pre-agreed number of developers work on a stream of projects determined by the customer.

ABOUT CALDERA PROFESSIONAL SERVICES

Caldera's Professional Services team originates from The Santa Cruz Operation, Inc. with over 20 years of experience with UNIX and Linux technologies. This acquisition created one of the largest Linux product and services companies in the industry with unrivalled service and technical expertise.

We have a team of highly skilled and certified individuals that help customers with solutions involving:

- Platform Architecture and Deployment
- Network Architecture and Implementation
- Web Enabling Applications
- Application Migration and Rejuvenation
